WORK EXPERIENCE

IntelliEvent - Riverside, CA

Mobile Application Developer

August 2024 - Present

- Developed a cross-platform freelance labor app using React Native and Expo Go, demonstrating strong initiative and project management skills.
- Implemented Firebase for backend services, including real-time database management and user authentication.
- Managed the entire software development lifecycle, from initial concept to deployment and maintenance.
- Conducted thorough testing and debugging to ensure a high-quality, error-free application.
- Demonstrated proficiency in mobile app development technologies, including React Native, Expo Go, Firebase, and JavaScript.

American Valet Parking Response - Riverside, CA

September 2024-August 2024

IT Strategic Consultant

- Created a detailed roadmap for integrating modern IT solutions into AVPR's operations, enhancing operational efficiency and customer satisfaction.
- Recommended transitioning from manual ticket management to a digital system, streamlining operations and improving data accuracy.
- Identified the importance of building a dedicated IT team and implementing cybersecurity measures to protect company data.

BlueCross-BlueShield - Columbia, SC

June 2022 – August 2022

UNIX System Analyst Intern

- Developed and executed Splunk server queries to identify and report unbacked UNIX servers, enhancing threat/risk management and compliance.
- Conducted a complete device inventory to ensure compliance with inventory-related controls.
- Analyzed and tested Splunk queries, implementing recommendations that optimized workflows and increased efficiency.
- Managed the BCBS employee resource portal, providing updated information to enhance clarity for new hires.

PROJECTS

Campus Connect – Columbia, SC

September 2022-May 2023

Software Developer

- Directed a 5-member team in an agile environment to develop "Campus Connect," enhancing the college experience for University of South Carolina students.
- Utilized React Native and JavaScript to implement core functionalities and ensure compatibility across multiple platforms.
- Managed Firebase for database administration, implementing personalized user profiles to improve functionality and user experience.

ATHLETIC ACHIEVEMENT

University of South Carolina & California Baptist University

- Competed at the D1 level for entire college career, balancing 20+ hour training weeks and travel meets with standard course load.
- Finished 16th in the 400IM at the 2023 SEC Championships, the fastest conference meet in the NCAA, assisting in USC's highest SEC finish in four years.
- Mentored teammates to adjust to collegiate competition, embrace team cultures, and adapt to college life.
